

Our Lady of the Nativity is a school which operates with the consent of the Catholic Archbishop of Melbourne and is owned, operated and governed by Melbourne Archdiocese Catholic Schools Ltd (MACS), where formation and education are based on the principles of Catholic doctrine, and where the teachers are outstanding in true doctrine and uprightness of life.

Principles underpinning our assessment and reporting

Horizons of Hope identifies the following principles of assessment for MACS schools:

Focused on growth

- Assessment and reporting will be relevant and timely to each learner.
- Students understand their learning progress.
- Students receive feedback about their challenges while forming and valuing positive attitudes towards learning.
- Educators critically question the impact of their decisions on student learning.
- Feedback is integral to the learning process, enabling students to self-regulate, self-assess and reflect on their own learning.

Relational

- Assessment and reporting will provide a strong foundation for authentic dialogue about learning progress between teachers, students and families.
- Students and teachers are both partners in the learning as the teacher constantly shapes and evolves their practice and pedagogy, while the student perseveres and progresses in response to evidence uncovered and timely feedback.

Ongoing and continuous

- Teachers are alert to the needs of students, founded on their knowledge of each student's narrative.
- Assessment, feedback and data-gathering techniques are authentic, varied and diverse.
- Assessment of learning is continuous, allowing students to demonstrate their progress and flourish.
- Feedback is continuous, accurate and forward-focused.

Definitions

Alternative framework is any recognised alternative curriculum framework, such as the International Baccalaureate program, available to Victorian Catholic schools if approval is granted and authorisation gained to deliver the program.

Assessment is the ongoing process of gathering, analysing and interpreting data about learners' progress and achievement to improve learning and teaching.

Curriculum area refers to distinct bodies of knowledge, skills and behaviours within a curriculum framework. In the Victorian Curriculum, these are known as Learning Areas and Capabilities.

Growth focuses on the full flourishing of the human person across multi-dimensional domains to achieve deep learning.

Progress is observable and measurable change in student learning based on evidence and multiple data sources that indicates development along a continuum of learning, and supports learners to see themselves as successful.

Reporting is the process used to communicate knowledge gained from assessing student learning. The purpose of reporting is to provide relevant information about a student's progress to students, parents, support staff and other teachers.

Standards describe the quality of learning (extent of knowledge, depth of understanding and sophistication of skills) that would indicate the student is well-placed to commence the learning required at the next level of achievement within the Victorian Curriculum F–10 and/or Victorian Certificate of Education (VCE), Victorian Certificate of Applied Learning (VCAL) study designs or units of competency within a Vocational Education and Training (VET) program.

Standard framework refers to the Victorian Curriculum F–10.

Victorian Curriculum and Assessment Authority (VCAA) is the statutory authority primarily accountable to the Minister of Education, for the provision of curricula and assessment and reporting in Victorian schools.

Assessment

At Our Lady of the Nativity, teachers assess and monitor student growth, learning progress and achievement against the curriculum standards and within the learning and teaching program at Our Lady of the Nativity .

At Our Lady of the Nativity school, we believe assessment is the ongoing process of collecting and analysing evidence of student learning in order to gain an understanding about an individual's (or a group's) current level of attainment as our basis for future learning. In order to gather comprehensive evidence of student learning, we believe that a variety of strategies and tools should be used. We believe assessment without feedback is merely judgement. "Assessment is integral to all teaching and learning. It is central to the PYP goal of thoughtfully and effectively guiding students through the five essential elements of learning: the acquisition of knowledge, the understanding of concepts, the mastering of skills, the development of attitudes and the decision to take action. The prime objective of assessment in the PYP is to provide feedback on the learning process." Making the PYP Happen, December 2009, pg. 44. Student Reporting is the process of communicating information to a range of stakeholders about student learning—including a student's level of attainment and the progress they have made at a specific point in time. The fundamental purpose of assessment and reporting is to improve student learning. This is true at the system, school and classroom level. Assessment and reporting of student learning is undertaken formally and informally for all learners.

Reporting

At Our Lady of the Nativity , the nature and frequency of feedback given to students and parents about individual assessment tasks are determined by teachers and leaders.

Our Lady of the Nativity complies with the Australian government reporting requirements. These requirements apply to the written reports on student learning and progress. Reports are provided twice annually for each student in each year they are enrolled at the school. More information about the specific requirements for reporting can be found in the Catholic Education Commission of Victoria Ltd (CECV) [Reporting Student Progress and Achievement: 2021 Revised Guidelines for Victorian Catholic Schools](#) (the Guidelines).

Review of assessment and reporting practices – Use of student learning data

Teachers at Our Lady of the Nativity document the processes they use to review practices for assessment and reporting. This information includes the ways in which data about student learning progress from a variety of sources is analysed to improve student growth and learning progress, and to guide learning and teaching programs.
